

SKILL 2

How do I multiply using a written method?

To work out multiplication using repeated addition.

Steps to success

- The first number tells you how many groups you will need.
- The second number tells you how many should be in each group.
- Add the second number the number the number of times the first number tells you to.

* You can use pictures to help you.

$$5 + 5 + 5 + 5 = 20 \quad 4 \times 5 = 20$$

Repeated Addition: = so x =
