

Skill 3

Steps to success

- ✓ Count out the number of objects you need, this is the Biggest number.
- ✓ Look at the smaller number, you need to put your objects into groups of this number.
- ✓ Using wheels can help you start out, dividing into 2's you can think about how many bicycles you could make.
- ✓ Your answer is the number of groups you end up with.
- ✓ If there are any left over, this is your remainder.

How do I divide using a written method?

I can divide practically by putting objects into groups the size of the number I am dividing by with a remainder.

$$7 \div 2 = 3 \text{ r}1$$
