

# SKILL 7

**How do I multiply using a written method?**

**To be able to use a number line to multiply a two-digit number by a one-digit number.**

## Steps to success

- Start at zero
- Partition the biggest number into tens and units.
- Multiply the smallest number by the multiple of ten and record this on the number line.
- Multiply the smallest number by the unit and record this on the number line.
- Your answer is below the number line.

$$23 \times 4 = 92$$
