

Skill 7

Steps to success

- ✓ Start at the number you are dividing
- ✓ Subtract the smaller number until you get to 0.
- ✓ Your answer is the number of jumps that you had to do.
- ✓ If there is any number left over this is your remainder.

How do I divide using a written method?

To be able to use repeated subtraction on a number line to divide by 2 digit numbers with a remainder.

$$54 \div 17 = 3 \text{ r}3$$
