

# Skill 9

$$144 \div 6 = 24$$

How do I divide using a written method?

To be able to use chunking on a vertical number line to work out division.

## Steps to success

- ✓ Start at the number you are dividing
- ✓ Subtract jumps of the number you are dividing by until you can take away no more groups of that number.
- ✓ Your answer is the number of whole jumps.
- ✓ If there is any number left over this is your remainder.  
Write down the number you are having to divide.
